The KAZAE series are new fountain pens representing “flow of wind” by the design of stripe pattern. They are coated with URUSHI to highlight the beauty. There are various names of wind in Japan over the centuries and those names stem from the season and the time zone. Each design of these fountain pens was named after those beautiful names of wind. The Gold Dust represents the image of something thrown up by wind and the Urushi Coating glitters the barrel and gives a spectacular impression beyond description.
